LeMarket demo: narration script

Two videos, 4:02 in total. Read each line when its caption appears on screen.

How to use this script

- **The captions are your cues.** Each row starts when its caption pill appears at the bottom of the video. If you fall behind, drop the rest of the line and pick up at the next caption.
- **The lines are written for a relaxed pace** (about two words a second), so there is room to breathe. Where a row has very little to say, let the video show it.
- **The videos are silent.** Play each one full-screen. Each opens with a two-second title card, so start speaking as the card fades.
- **Times are minutes:seconds into each video**, to within about a second.

Video 1: Trading app `2:32`

File: `LeMarket-trading.mp4`. A new client, Lebron James, opens an account and makes his first trades.

TIME	CAPTION ON SCREEN	SAY
0:00 to 0:09	**Welcome to LeMarket**	This is LeMarket, a trading platform for US stocks. Let's follow a brand-new client from sign-up to his first trades. *Start as the title card fades.*
0:09 to 0:22	**Open an account** **About you**	Lebron James opens an account in four short steps. First, the basics: name, date of birth, phone and email. Each field is checked as he types.
0:22 to 0:31	**Home address**	Then his home address. We only open accounts for US residents, as brokerage rules require.
0:31 to 0:39	**Identity & funding**	Identity and funding. He deposits five hundred thousand dollars, which unlocks the Experienced investor option.
0:39 to 0:47	**Sign-in details**	Last, a username and password. The checklist ticks off each password rule as it's met.
0:47 to 0:53	**Sign in**	His account is ready, so he signs in with his email.
0:53 to 0:59	**Your overview**	His overview shows portfolio value, open orders, and half a million in buying power.
0:59 to 1:04	**Live market**	Market lists every stock, with live prices and today's trend.
1:04 to 1:10	**Build a watchlist**	One tap on the star adds Apple, Nvidia and Microsoft to his watchlist.

TIME	CAPTION ON SCREEN	SAY
1:10 to 1:13	**Find a stock**	He searches for Nvidia…
1:13 to 1:19	**Live quote and chart**	…and gets the live quote, today's range, and a chart by day or week.
1:19 to 1:28	**Buy 100 NVDA**	He buys a hundred shares at market. The estimate updates as he types; the server, not the browser, sets the price. *Remember this order: it comes back in the staff video.*
1:28 to 1:39	**Buy by dollar amount**	He can also buy by dollar amount. Ten thousand dollars of Apple buys forty-two whole shares, and the form shows the change left over.
1:39 to 1:43	**Watch it fill**	Both orders filled in seconds.
1:43 to 1:48	**Every order, tracked**	Each order shows every step, through to the price paid.
1:48 to 2:00	**Sell 20 NVDA**	Selling works the same way. He sells twenty Nvidia shares; the form shows what he'll receive, and the server checks he actually owns them.
2:00 to 2:04	**Your holdings**	Holdings: what he owns, and his gain or loss.
2:04 to 2:12	**Every NVDA trade**	Open a stock to see its trade history, the average price paid, and what it's worth now.
2:12 to 2:21	**Portfolio at a glance**	Back on the overview, his money is now invested: the split by stock, its live value, and today's biggest movers.
2:21 to 2:32	**Learn the basics**	And for newer investors, Learn offers short plain-English lessons and a practice simulator. That's LeMarket for clients.

Video 2: Staff app `1:30`

File: `LeMarket-staff.mp4`. Trading Operations and an Analyst look at the same trades.

TIME	CAPTION ON SCREEN	SAY
0:00 to 0:09	**Trading Ops sign-in**	Now the staff side. Staff have their own app and their own sign-in, starting with Trading Operations. *Start as the title card fades.*
0:09 to 0:17	**Find a client's trades**	Trading Ops can pull up any client's completed trades. Here are Lebron's three trades from a moment ago.
0:17 to 0:29	**Full order timeline**	Each order has a full timeline from the audit trail: submitted, every rule check it passed, accepted, settled and filled, all timestamped.
0:29 to 0:33	**Surveillance alerts**	Alerts flag orders that need a second look.
0:33 to 0:41	**Large order flagged**	Lebron's hundred-share Nvidia order was flagged automatically as a large order, with its timeline one click away.
0:41 to 0:43	**Sign out**	Switching roles…
0:43 to 0:50	**Analyst sign-in**	…to an Analyst. Analysts see read-only, aggregate reports, never a client's personal details.
0:50 to 0:56	**Trading volume**	Volume compares periods and flags any swing of twenty-five percent or more.
0:56 to 1:03	**Most active stocks**	Lebron's trades already count: Nvidia and Apple top this week's most active stocks.
1:03 to 1:10	**Activity by period**	Activity by period breaks trading down by day, week, month or year.
1:10 to 1:17	**Activity by stock**	By stock shows shares traded and total value for each stock.
1:17 to 1:22	**Client segments**	Segments compare retail, active trader and high-net-worth clients.
1:22 to 1:25	**Overnight reports**	Heavy reports run overnight.
1:25 to 1:30	**Access by role**	And roles are enforced: an analyst can't open Trading Ops' tools. *End of demo.*
